1 A word applied since the 17th c. to the triangular part, resembling a low gable, crowning the front of a building in the Greek style of architecture, especially over a portico. It consists of a flat recessed field framed by a cornice and often ornamented with sculptures in relief Also applied to similarly placed members in the Roman and Renaissance styles, whether triangular, semicircular, or of other form, also to those of similar shapes placed over niches, doors, or windows Hence, in *Byzantine art*, Any member of similar form and position, as one placed over the opening in an ironwork screen, etc.

[Note. *Fediment*, as in *fediment* in Randle Holme *p. lement* has the appearance of a derivative in *-ment* of *f pes pedis* 'foot'. But *pedis* *situs* was a vine stake or prop. It is *pedis* *situs* = foundation ground w rke base or footing (Florio) senses with which the modern pediment has no connection. Evelyn's word was evidently an attempt to connect the pediment upon the workmen's *perriment* or *perrin* ! which is the translat r of *Hypaetos machis* considered to be corrupt English for *perimeter*. But the corruption of *perriment* to *pediment* is difficult to imagine and the connexi n of sense (see Willis *Archit Nomencl. Milt. &* 23 *note*) is far fetched; and it seems more likely that *perriment* is a workman's corruption of *pyramid* which a triangular gable sometimes resembles in section and which is actually pronounced *perriment* or *perrimint* by the illiterate in the home districts of England, e. in West Somersetsh) at the present day. This would also l ter explain the peremint of the Coundite in 1601 above since the P ountain in question has no pediment, but a curved roof in form of an ogee cupola. If this is the derivation we have the series *pyramid, perriment, perriment pe la pete p dim ent.*]

Exactly the same sense as 1 below was expressed in the 14th c by Pier v (app = LG *piren*); and *peer* has accordingly been assumed to be merely a later form or spelling of *pire* But besides that there was a clear chronological gap between the two words *peer* is not a phonetic development of *pire* and cannot so far as is at present known, be formally identified with that word; whether there was any irregular or ulterior connexion does not appear In 15–16th *c*, *pere*, *peere* were also ordinary spellings of Peer = *equipper*; and in many instances (see senses 2 3 below) the use of *peer* comes so close to that of *pear* (*appear*) that it is difficult to believe that there was not some blending of the two words, attributable to the fact that when *peer*, to look out, is said of inanimate things, the meaning is that they *appear* as if they were looking out Even in some of the Shakespeare uses of *peer* it is difficult to determine whether the things are thought of as looking out, or as just appearing]

I The bird

1. The name now appropriated to a genus *Pelecanus*, of large gregarious fish-eating water fowls, remarkable for an enormously distensible membranous pouch which depends from the lower mandible of the long hooked bill and is used for the storing of fish when caught Two species *P. onocrotalus*, the Common or White Pelican and *P. crispus*, the Crested Pelican are found in South-eastern Europe and adjacent regions, including the original 'pelicans', to these the North American species *P. trachyrhynchus* is very closely allied Other species are found in the West Indies, Africa, India the Malay Archipelago and Australia

In all the quotations down to 1681 the name is applied to the White Pelican in vague allusion to the fact that it is found in England and the word merely means 'bird' as in the Vulgate in Ps. ci. 7 *factus sicut nycticorax* the pelican of the wilderness which was app. rendered by the Seventy in the Vulgate has *onocrotalus* and the name of the modern pelican Elsewhere *Cornix* in Lev. xi. 18 Deut. xiv. 17 (LXX) VI 709) St. Jerome makes two kinds of *nycticorax* to be found in the water bird the other that of the Ibises (consorting with *ibim* genera aliud aquatile ali di solitudi- *ibis* Vulgate (*Orig* XII xii 32) The equipment of the pelican St. Jerome *Brevis in Isaiā* (Vallarsi VII Appx 271) says two kinds of *pelicanus* (between these two names) *nycticorax* while ce ultimately in Trevisa *qui.* 1398 below

Penguin (pe·ngwin, pe ŋgwin) Also 6-7 **pengwin, gwyn, guyn, 7 -guine,** (8 pin) [Origin obscure see Note below. It appears that the name was first given to the Great Auk or Gare-fowl of the seas of Newfoundland, still called in F. *pingouin* or *pinguen* (1600 in Hatz Darm) But it was soon applied also to the birds now called *penguins*, in F *manchots* (found by Drake at Magellan s Straits in 1578), which have a general external resemblance to the northern bird, though, in the opinion of zoologists, widely removed in structure In this sense, also, Du and Ger *pinguin*, Da and Sw *pingvin*, all from English]

[*Note.* Our earliest examples of the name *pengu in* are due to Hakluyt His account of Hore s Voy 1536 to Cape Breton was taken down by him some fifty years after from the mouth of Thomas Buts, a survivor of the voyage If we could be sure that the name Penguin Island dated back to 1536 this would be the earliest example of the word, as it is certainly the earliest English notice of the bird. Ingram s *Narrative* if reliable, would be evidence for the name in 1568-9 but this tale is discredited by the evi dence only that he had heard of the penguin by 1582 four years later than Parkhurst s letter to Hakluyt. The southern fowl found by Drake as by Magellan before him at Magellan s Straits, is fully described in *The World Encom passed by Sir Fran s Drake* published by his nephew in 1628 out of the Notes of Mr Francis Fletcher, Drake s chaplain (ed Hakl Soc, 1854 p 75) but no name is there given to it The name occurs however in a MS of 1677 stated to be a transcript of Fletcher s original Notes of 1578 infinite were the number of fowles which the Welsh men named Penguin and Magalanus tearmed them geese (*ibid* 79) but if these Notes of the name from Drake s visit of 1628, a d from three other 16th c accounts of the voyage (*Ibid* Appendix 217 235 270) in which the bird is described, makes the occurrence of *Penguin* in Fletcher's original Notes somewhat doubtful The name certainly occurs in the narrative of Candendish or Cavendish 1588, though his state ment that Drake named one of the Falkland Islands in virtue of which that of the eye witnesses Fletcher and Wi ter (*ib* d 76 279 who both state that he named it *Sr Francis Drake s Island* in honour of Sir Francis Drake) that of the name *Penguin* to the Welsh men and its explanation as Welsh *pen gwyn* white head appears also in 1 Ingram s ad later in Sir Thomas Herbert s *Travels*—ed. 1634 as a surmise in ed 1638 as an accepted fact But, besides that the Great Auk had not a white head (though it had white spots in front of the eyes), there are obvious historical difficulties which some would remove in part by supposing the name to have been originally given by Breton fishermen Other suggestions that the name is derived from *Penn* a fat or is an alteration of pan wing referring to the rudimentary wings, are merely unsupported conjectures.]

In ME. the plural *penegas*, *peneyes*, branched through *panes*, *pannus*, *pennis*, *pens*, to the 14th c. *pans*, *pens*, the latter only spelt in 16th c. *pence* But, beside this, the fuller *penys*, *pennys*, *pennies*, continued in restricted use see the forms in A 2 *β*, and signification in B 1 c.

The OE. and cognate forms point back to the types **panning, *pandling, *panning*, a series which does not conform to any phonetic law, but suggests that the word was foreign and of unsettled form. But it was evidently of WGer, or even (unless the ON was borrowed from OE.) of Common Germanic age. No foreign source however is known; and the suffix *-ing*, occurring in other names of coins, as *shilling, farthing*, OHG *chesuring* etc., bespeaks at least a Teutonic formation on a radical element *pand* or *pan(n)*. This has been sought in WGer **pand*, OHG *pfand*, Pawn, with reference to a possible use of the *pandling*; and in WGer. *panne*, Ger *pfanne* Pan, with possible reference to shape. Of these words themselves the Germanic origin is uncertain.]

c The full plural, *pennies* (A 2 *β*), is now used only of the individual coins, *pence* (A 2 *γ*) is usually collective, expressing the amount, however made up, but it is sometimes used of individual coins, when the stress is laid upon their being such. *Pence* is especially used after numerals, where from *twopence* to *elevenpence* (rarely *twelvepence*) and in *twentypence*, it is stressless (to pĕns, etc) and now written in combination. See these words With other numbers *pence* is written separately (or hyphened) and has a separate stress, as *eighteen pence* (*ē tinpe ns*)

When combination means a single coin or even a single amount, it is treated as a single substantive and may have a plural, e g a new sixpence, two sixpences the sixpence which you gave me, how many eighteenpences are there in ten shillings? See Twopence, Threepance etc To such combinations, *halfpenny* and *farthing* are added without and with a genitive construction, thus halfpenny farthing foreign post card, ' a sixpence halfpenny shop' these phrases may also take a plural see quot 1714 Adjectives and participles in combinations are formed with *penny*, e g *twopenny*, etc. see 10.

Such pensions are provided in most civilised countries by the State or other public body for its officers and servants on retirement from active service and for their widows and others on being disabled in the public service or for their wives and families in the case of death; they are also frequently granted as a matter of favour to ease the claims of authors, etc. in recognition of eminent achievements or to the r widows or orphans when left in straitened circumstances.

Old age pension a pension or payment of so much per week or month paid to a workman or poor person (or as some advocate to every one) on reaching a specified age: as is done in some foreign countries and British Colonies, and as has been proposed in Great Britain.

A sb A verse or line consisting of five feet.

1 In Greek and Latin prosody A form of dactylic verse composed of two similar halves (pentheminmers), each consisting of two feet and a long syllable (thus equivalent to a dactylic hexameter with the second half of the third and of the sixth foot omitted), in the first penthemimer each of the two feet may be either dactyl or spondee, in the second they must both be dactyls. Most commonly used in alternation with hexameters, constituting *elegiac* verse see Elegiac A. 1

The name arose from a supposed division of the verse as two dactyls (or spondees), a spondee, and two anapæsts.

L. *appendicium* an appendage, f. *appendere* to hang something on another, to attach in a dependent state As a small building, erected as a ‘lean to’ to another, has usually a roof with one slope only, the word was evidently from an early period (esp in the aphetic form) associated with F *pente* declivity, ‘hanging’, which became at length a regular element of the sense; hence the later popular etymology *pent-house* for *pentis* cf. *work house*, vulgarly *works*.

The OF *apendis* and *apentis* appear to represent L. *appendicium* and **appicium*. But the early history of the word offers difficulties, esp that in OF the short forms without a- are very rare, while in Eng they are the earliest, *appentice* not being known before Caxton]

Per-, *prefix* 1 The Latin preposition *per* (see prec) used in composition with verbs, adjectives and their derivatives A large number of these have come down through Fr and Eng others have been adopted directly from Lat or formed in Eng on Latin elements, or (as was frequent in 16–17th c) on words already in Eng use The following are the chief uses in Latin and English

1 As an ety mological element In the senses 1 Through, in space or time; throughout with verbs (and their derivatives), as *perambulate* to walk through, Perabb lain, *perf ct* e to bore through, Per forate, *perv de* to go through Per sist, *perl gate* to watch through Perrigilate; formi g adjs. as *persist* havi g a way through Perv us.

2 Through and through thoroughly completely to com pletion to the e d with verbs (and derivat ves) as *perfect* to do thoroughly complete Perfect *persui ade* to change throughout or completely, *perforate*, *perforce* to Ia terrate, *perturbate* to Perturb so Perse, etc

3 Away entirely to destruction to the bad with verbs (and derivatives) as *perdeer* to do away to destruction (Perdition) *pere e* to go to destruction Perish *perverti* to turn away evilly. Per vert *per i sh e* to take away entirely destroy an inhabi t (Le ruction).

4 Throughly perfectly, extremely very with adjs. and advbs. as *perac ti* s very sharp Peracute *perdiligent* very diligent, Perilleus, *per* ilously, *perfamous* very famously so in Eng w th derived sbs. or their analogues) in sense very great extreme, as *perdility*, *etc peradventeuse*

II In *Chemical* nomenclature (From 4 above)

5 Forming sbs and adjs denoting the maximum (or supposed maximum) of some element in a chemical combination, esp

a With names of binary compounds in HE (formerly *uret*), designating that in which the element or radical combines in the largest pro portion with another element, e g Peroxide Per chloride († *perchloruret*) Per iodide, Persul phide († *persulphuret*) q v Also **perbromide** (†**perbro muret**) a compound of bromine with another element or radical, in which the bromine is present in larger proportion than in other com pounds so *percy anide* († *cya nuret*) *perphosphide* († *phosphuret*), etc Hence in derivative verbs, etc as Peroxidate, oxidize, *perphosphuretted* etc

This use of *per* was introduced in 1815 by Dr T Thomson in his *System of Chemistry* ed 2 for combi nations of oxygen with a metal, *peroxide* being used to indicate that the metal is thoroughly oxidized The com bined with as much oxygen as possible see Peroxide. It was subsequently extended to combinations of other ele ments, as Perchloride etc In strict chemical nomen clature names in *per* 1 are best restricted to the oxygen seded by those with more defin te numerical prefixes (e g *perox de of manganese* by *manganic di* (4), or by others in which the constitution of the substance is differently expressed (e g *perc l oride* and *p ox de of iron* by *ferri klor de ferric oxide*). But the *per* compounds are retained in some ase especially in popular use.

b With adjs in IC, naming oxides, acids, etc., designating that compound which contains the greatest proportion of oxygen (and consequently the least of the element named, as **perboro mic** acid hydrogen perbromate, $HBrO_4$, **perchlo ric** *acid*, H_2ClO_4, **perchlo ric** *oxide*, iridium peroxide IrO_2, **perni tric** *acid* HNO_4, **pero amic** *acid* (= *oxide*), OsO_4, **perruthe nic** *acid* (= *oxide*) RuO_4, etc See also Perchloric, -iodic, man ganic, etc. Also in names of the salts of these acids, and analogous bodies, as Perchlorate iodate, manganate, sulphate q v *perchro mate*, *perri date perni trate perphosphate* per *ti tanate* etc.

Many of these also are now abando ed for names other wise formed; e g *persulfuric of iron* of s *cyanny* no v *ferric* and *mercuric nitrate*
